TUGULDUR TUMURBAATAR

Ulaanbaatar, Mongolia | +976 95518464 | tuguldur.tmrbtr@gmail.com
LinkedIn | tugu-tmrbtr@github

Summary

DevOps / SRE / System Engineer with experience across software development, systems operations, cloud infrastructure, container orchestration, and CI/CD. Experienced in designing, deploying, troubleshooting, and optimizing production infrastructure using Kubernetes and VMware, Docker, Terraform, Ansible, and CI/CD platforms. Strong background in Linux systems administration, infrastructure automation, observability, database systems, and cloud technologies. AWS Certified Solutions Architect – Associate.

Professional Experience

MobiCom Corporation — SRE / Systems Engineer Ulaanbaatar, Mongolia
2024-10-01 – Present

- Design, operate, and troubleshoot production infrastructure and distributed systems with a focus on reliability, availability, and performance.
- Manage and optimize Linux-based systems, containerized workloads, cluster environments, and supporting infrastructure.
- Develop and maintain CI/CD pipelines to automate application build, testing, deployment, and release processes.
- Implement Infrastructure as Code and configuration automation using Terraform and Ansible.
- Monitor infrastructure and applications using Prometheus, Grafana, Loki, and Dynatrace.
- Troubleshoot application, infrastructure, networking, database, and deployment-related issues across development and production environments.
- Collaborate with development and operations teams to improve system reliability, deployment processes, and operational efficiency.

MongolContent LLC — DevOps / Systems Engineer Ulaanbaatar, Mongolia
2023-07-04 – 2024-09-30

- Managed Linux infrastructure, application deployments, and production operational environments.
- Designed and maintained Docker-based application environments and CI/CD workflows.
- Automated infrastructure and operational tasks using Ansible and scripting.
- Supported Kubernetes-based workloads and containerized applications.
- Performed system troubleshooting, configuration optimization, performance analysis, and incident resolution.
- Worked with databases, networking, reverse proxies, monitoring, logging, and deployment infrastructure.

Erdenes Solutions — Full Stack Developer Intern Ulaanbaatar, Mongolia
2022-02-11 – -2022-11-23

- Developed web applications and backend services using JavaScript/Node.js and Python.
- Designed and integrated REST APIs and database-backed application components.
- Worked with SQL databases and application-level data management.
- Participated in application debugging, testing, deployment, and performance optimization.

Education

Mongolian University of Science and Technology (MUST) Ulaanbaatar, Mongolia
Bachelor of Technology in Information System 2019 – 2023

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems (DBMS), Operating Systems, Cloud Computing, Computer Networks, System Design.

Certifications

AWS Certified Solutions Architect – Associate — Amazon Web Services

Technical Skills

Languages: Python, TypeScript, SQL, Bash, NestJS, NextJs
Cloud Platforms: AWS, DigitalOcean, Cloudflare
Containerization & Orchestration: Docker, Docker Compose, Kubernetes, K3s, Rancher, Helm
Virtualization: VMware, HPE Simplify, Proxmox, Incus, ESXIs
Infrastructure as Code & Automation: Terraform, Ansible, AWX, Infrastructure as Code (IaC)
CI/CD & DevOps: GitLab CI/CD, GitHub Actions, GitLab Runner, GitOps
Observability: Prometheus, Grafana, Loki, Dynatrace, Zabbix
Databases: MySQL, PostgreSQL, MariaDB, MongoDB
Systems & Networking: Linux, NGINX, HAProxy, DNS, CDN, TCP/IP, Load Balancing
Developer Tools: Git, Postman, VS Code, Vim

Additional Experience

- Kubernetes and VMware HCI cluster deployment and administration
- High-availability infrastructure and distributed systems
- Database operations, troubleshooting, replication, and performance optimization
- Cloud migration and infrastructure modernization
- Production incident troubleshooting and root-cause analysis
- Infrastructure monitoring, logging, and observability
- Containerization and application deployment
- Infrastructure automation and configuration management
